

Kelsey Marcum, Business analyst (Analytics field) at ArcBest Technologies

Mathematics and Electrical engineering undergrad from Arkansas Tech University,  
University of Arkansas Executive Masters of Business Administration ( EMBA)

She went into STEM for the love of mathematics. Her favorite high school class was calculus and her favorite college class were calculus 1-3 and differential equations. Her dream job is to be a mathematics professor at a university.

Don't give up on STEM passion and know that there are other women and girls who have a passion for STEM majors and jobs that can help guide them through their careers and schooling. Also know that girls and women are just as smart and capable of excelling in this field as boys/men.
