

Bridget Jones, Mechanical Engineer-Product Architecture Management at ABB

Bachelor of Science-Mechanical Engineering from University of Arkansas

Master of Business- Emphasis in Leadership and Ethics from John Brown University

I have always had an interest in math and science but never knew where to go with it other than to be a teacher. I watched my parents work very hard with their hands and they always told me to find a career path using my brain. I was introduced to STEM 2 weeks before my high school graduation and decided to take a leap of faith and enroll in some summer introductory classes to see if I had any interest in the coursework. I fell in love with mechanical engineering because of its ability to allow me to see and use mechanical movement..

Favorite classes in high school Calculus and Physics

Favorite classes in college Intro. to Engineering, Dynamics and Mechanics of Materials

Dream job: Roller Coaster Designer

Advice: Never take “No” for an answer, don’t be afraid to be uncomfortable, always try new things when given the opportunity and don’t be afraid to take the road less traveled.
