

Melanie Medlock, IS manager (software development manager) at ArcBest Technologies
CIS Bachelors- ATU, with CS & Math background

She found her STEM position through her interest in programming in college.
Her favorite classes in high school were math, physics and literature and in college her favorites were programming classes, differential equations and writing.

Girls can be awesome in STEM careers! Don't let stereotypes or perceptions of "hard" classes keep you from exploring something you might be interested in!
